

Jobsite Orientations and Alerts in One Powerful Platform

What is MindForge?

MindForge is a construction-focused site orientation and alert platform that ensures every worker stays informed and safe. By delivering video site orientations and ongoing real-time job site alerts that automatically translate to Spanish, MindForge eliminates miscommunication, reduces costly mistakes, and saves time, keeping projects on track and owners happy.

How MindForge Works

Assign Orientation: Workers scan a QR code to access multi-lingual video orientations and quizzes, ensuring they receive site-specific safety info before starting work. Completion is tracked automatically.

Send Alerts: Instantly notify crews of critical jobsite updates, logistics changes, and weather alerts. Messages are sent to workers' phones and auto-translated to Spanish for Spanish-speakers.

Track Engagement: Easily track who has completed orientations and viewed alerts. Get real-time insights to hold workers accountable. ensure every worker stays informed and ready to do their best work.
