US COMPLIANCE

INDUSTRIAL HYGIENE SERVICES

U.S. Compliance provides a complete range of industrial hygiene and environmental testing services. Our service is designed to meet the regulatory needs of general industry.

We offer upfront consulting and support, before engaging in a project, to determine the correct sampling needs and ensuring everything is done correctly the first time. Our unique model offers either hybrid or onsite sampling, where we secure, calibrate, ship materials, and finalize a report with QA/QC data for each event following established regulatory methods.

Common industrial hygiene and environmental services include:

- Evaluation of employee exposures for Hazard Communication (HazCom) programs
- Evaluation of exposures for Respiratory Protection programs
- Assessment of PPE needs and suitability
- Responses to employee concerns or neighbor impacts
- Noise surveys for hearing conservation programs
- Stormwater outfall sampling
- RCRA waste determinations
- Wastewater discharge evaluations

Our clients have access to our team of regulatory compliance specialists who can work with yours to make relevant determinations of next steps, best management practices and potential impacts to compliance status.
